Instruction for HW8

HW8 is due Nov 8th

Part 1. Hint: You may want to xpathSApply(root, path, xmlValue) function in extracting specific attribute from tree, and for you need to write path by yourself.

Part 2. For this part, the function you may use: newXMLDoc, newXMLNode. When you create the root, call it "kml", and use http://www.opengis.net/kml/2.2 as namespaceDefinitions.
The basic structure is shown below:
